

Protect your patients,
employees & reputation
with Apex total water
safety solutions.

Reduce waterborne risk. Maintain compliance. Protect your reputation.

OVERVIEW

Water systems in healthcare and commercial facilities present ongoing risk—from Legionella and other waterborne pathogens to compliance gaps and operational challenges.

Managing these risks across multiple systems requires more than isolated solutions. Without a coordinated approach, facilities face increased exposure, regulatory pressure, and potential liability.

Apex delivers integrated water safety programs that reduce risk, support compliance, and improve system performance across your entire facility.

THE APEX SOLUTION

Apex provides a comprehensive approach to water safety—combining program development, testing, treatment, and ongoing support into a single, coordinated strategy.

- **Water Management Plans (WMP's)** aligned with CMS and ASHRAE guidance
- **Comprehensive testing & monitoring** through certified laboratory services
- **Targeted treatment solutions** for system wide and point-of-use protection
- **Ongoing service, optimization, and compliance support**

Reducing Risk Across Every Water System

WHY APEX?

Apex delivers more than individual services—we provide a complete water safety strategy designed to reduce risk, ensure compliance, and improve operational control.

Our integrated approach connects program development, testing, treatment, and service—helping facilities manage complex water systems with confidence.

- **Single partner** for total water safety
- **Rapid response** for urgent situations
- **Dedicated experts** supporting your facility
- **Proven experience** in healthcare and regulated environments

APEX WATER SAFETY SOLUTIONS

Programs & Compliance

- Water Management Programs (WMPs)
- Regulatory alignment (CMS, ASHRAE 188, AAMI ST108)

Testing & Monitoring

- Legionella and pathogen testing
- Certified lab analysis (CDC ELITE, A2LA)

Treatment & Protection

- System disinfection (emergency & ongoing)
- Point-of-use filtration
- Secondary disinfection systems

Service & Optimization

- Equipment maintenance and support
- Cooling tower cleaning & treatment
- Training and program development

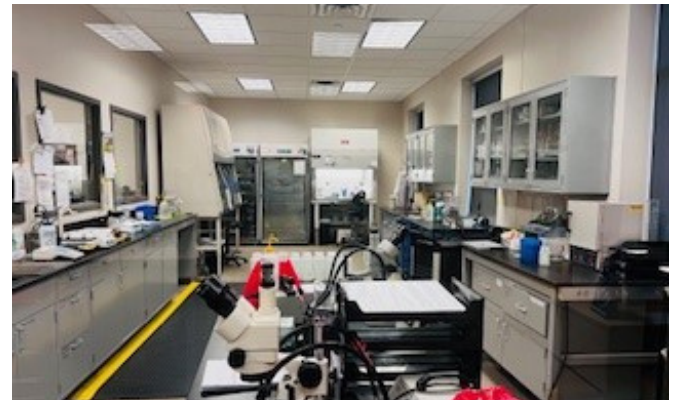

REAL WORLD IMPACT

Facilities implementing Apex water safety programs achieve:

- **Reduced waterborne pathogen risk** across systems
- **Improved compliance readiness** with CMS and ASHRAE standards
- **Faster response** to potential contamination events
- **Greater confidence** in system performance and safety

PROVEN PERFORMANCE

Apex Water + Process Microbiology Lab

IMPROVE WATER SAFETY AND COMPLIANCE

Connect with Apex to build a comprehensive water safety program for your facility.
