

# Smart Solutions, Measurable Results

Apex Water + Process helps customers solve complex water and process challenges with practical solutions built around performance, reliability, and compliance.

From engineered equipment and treatment programs to automation, testing, and hands-on support, we bring the expertise and responsiveness needed to help operations run at their best.

# Complex Challenges. Clear Solutions.

Integrated expertise, equipment, chemistry, and service to help improve performance, reduce risk, and keep operations moving.

# Smarter Water + Process Solutions for Complex Operations

## Integrated Water and Process Solutions

### OVERVIEW

Apex supports critical operations with water and process solutions designed to improve efficiency, strengthen system reliability, and simplify day-to-day management. By combining engineering, treatment expertise, automation, testing, and field support, we help customers address challenges proactively and operate with greater confidence.

### OUR CAPABILITIES

#### Engineered Water Treatment Solutions

Pretreatment, filtration, RO, DI/EDI, chemical feed systems, clarification equipment, cooling and boiler treatment systems, wastewater solutions, and modular water systems.

#### Automation + Remote Monitoring

Remote monitoring and control, system automation, deposit and corrosion monitoring, reporting, calibration, and troubleshooting support.

#### Comprehensive Water + Process Treatment

Chemical treatment programs for boiler, cooling tower, closed loop, potable water, process water, wastewater, and sterile processing applications.

#### Consulting, Testing + Risk Management

Water management planning, Legionella and biological testing, risk assessments, efficiency studies, corrosion studies, and filtration support.

#### Engineering, Design + Fabrication

Custom water treatment equipment, process equipment support, clean room assembly, controls integration, and custom metal fabrication.

#### Operator Training + Ongoing Support

Training, inventory management, program reviews, maintenance programs, cost-savings identification, and tailored service plans.

## Apex Advantages

### INTEGRATED SOLUTIONS

Apex brings together equipment, chemistry, automation, testing, and service in one coordinated approach.

### RESPONSIVE EXPERTISE

Our team works as an extension of yours, delivering practical support, fast response, and deep technical knowledge.

### OPERATIONAL FOCUS

We help reduce downtime, improve visibility, support compliance, and optimize system performance.

### FLEXIBLE SUPPORT

From one-time system needs to ongoing service relationships, Apex provides support that fits the operation.

### DATA-DRIVEN INSIGHT

Monitoring, reporting, and analysis help turn system information into better decisions and stronger outcomes.

### INDUSTRIES WE SUPPORT

- Ag Processing
- Agriculture
- Biofuels
- Healthcare
- Pharmaceutical
- New Construction
- Manufacturing
- Power & Heavy Industry
- Food & Beverage
- Commercial

### RELIABLE, SCALABLE SUPPORT FOR THE SYSTEMS YOU DEPEND ON

Engineered Solutions

Data-Driven Visibility

Hands-on Service
