

# ReclaimX™ WT

## Circular Water Platform

Turn Wastewater Into a High-Value  
Utility Asset

Save Water. Reduce Costs. Power Resilience.

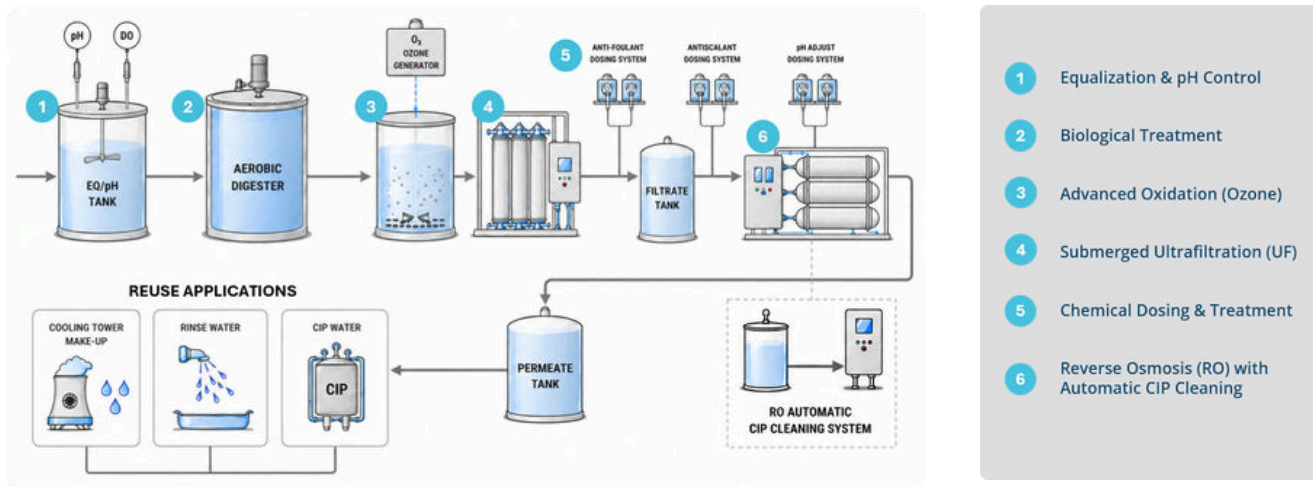

# Transform Wastewater Into a Competitive Advantage

## Overview

Manufacturing facilities are facing rising water costs, increasing municipal surcharges, and growing pressure to improve sustainability performance. Apex ReclaimX™ WT program helps industrial plants transition from a "use-and-discharge" model to a Circular Water Strategy by reclaiming wastewater and returning it to the plant as valuable utility water.

## How ReclaimX™ WT Works

Designed for Food & Beverage processing and industrial manufacturing facilities, Apex ReclaimX™ WT program integrates biological treatment, advanced oxidation, ultrafiltration, chemical treatment, and reverse osmosis into a single engineered platform that delivers reliable, clean, and sustainable water for critical plant operations.

Water reuse is underutilized, rapidly growing, and highly impactful

6.4%

U.S. wastewater reused today

37%

Increase in water reuse by 2027

70%+

## Wastewater

# Built for Food & Beverage Processing and General Manufacturing Operations

### Tailored for Your Industry Applications

#### Food & Beverage Processing

- Beverage plants
- Breweries
- Dairy Processing
- Food ingredient manufacturers
- Bottling facilities

#### General Manufacturing

- Chemical manufacturing
- Industrial processing
- Biofuels
- Consumer products manufacturing

### The Apex Implementation Process

**Pilot → Design → Build → Commission → Service**

Every Apex ReclaimX™ WT project begins with pilot validation to confirm treatment performance and establish design criteria using actual site wastewater characteristics. This data-driven approach minimizes risk and ensures long-term system performance.

### The Value of Apex Partnership

Apex helps manufacturers recover valuable water resources, reduce operating costs, and build long-term resilience.

Contact your Apex representative for a site survey, pilot evaluation, and ROI analysis.

**Reduce  
Cost**

**Save  
Water**

**Enhance  
Reliability**

**Improve  
Sustainability**

# Recover More. Discharge Less. Reuse Smarter.

Apex delivers comprehensive water reclaim systems and solutions that integrate customized chemical treatments, cutting-edge equipment, and the proprietary WaterSim™ modeling platform. We provide real-time insights and trusted expertise, enabling facilities to maximize efficiency, extend equipment life, and optimize water reuse with confidence.
