

Cooling Tower Inhibitor Programs

Novel New Corrosion Standard

Cooling tower treatment programs strive to reduce the corrosion rates of metals in the systems. While traditional programs can do a good job as long as the operating conditions are within predefined ranges, Apex's ProFect™ Cooling Treatment Programs can achieve **50-100% reduction in corrosion rates** ...even in systems with excursions.

When “Good” Isn’t Good Enough

- Better System Protection During Upsets
- Low to Zero Phosphorus Options
- Protect Industrial Assets 1-2x Better Than Traditional Chemical Programs
- Lower Oxidant Demand
- Better Environmental Footprint
- Premium Program Results at Traditional Program Costs
